EXPERIENCE

Business Data Intern   *March 2022-Present*
Account Spark — *San Francisco, CA (Remote)*
- Cleaned and modeled data for +$150k consulting contracts—Twilio, Sauce Labs
  - Used Python, SQL, and Excel to analyze data
  - Delivered market segment report + sales rep territory design

Private Equity Intern   *October 2021-March 2022*
Industrial Succession Group — *Los Angeles, CA (Remote)*
- Built Python tool to automate deal flow (web scraping + database input)
- Managed deal database
- Researched and modeled leveraged buyouts and discounted cash flow valuations—aerospace, defense, and automotive companies

PROJECTS - https://github.com/asm8689/personal

Discount Cash Flow Tool *(Spring 2023)*
- Created a java program for an Equity Valuation class that facilitates discounted cash flow valuations
- Pulls macro economic data and assumptions from the web
- Automates cash flow projections and calculates equity values based on user inputs + pulled web data

BizBroker Web Scraper *(Spring 2022)*
- Implemented a web scraper with Python to extract data from business broker listings
- Automated data cleaning and organization into company spreadsheets
- The tool streamlined the manual data collection process for gathering market research, significantly lowering time requirements
